Education

2002 - 2005	Vocational Qualification in Business Information Technology, JavaScript, PHP, MySQL, SQL, Networks, Visual Basic 6 (great teacher), 4.2 score. Did a bit Visual Basic guiding to a class. It was very memorable.
2004 - 2008	Open University of Turku, Java studies noted. Answering to Java related questions from the class was fun also.
2015 - 2016	Kajaani University of Applied Sciences, 3.2 score (did not finish all studies)
Projects there	Unity C#, and JavaScript Game projects: Robot fight (2 Player Robots kicking, punching and hitting), Shmupparit.itch.io, Battleship demo (1 Player a Cruiser shooting down on submarines. Unlimited submarines possible. Warning. Freezes computer) Unreal C++: 3D cars driving rally on a limited area, cars obstacles, Freedom of Liberty Statue used at one version Frameworks experienced only a little: Jopnal C++
2017 - 2018	Studying at Otavan nettilukio (trying to get the "lakki")
2019 - 2022	Studying at Salon lukio (chasing "lakki" continues)
Now	Game projects: TIC-80/pico, Sprites, Levels & Music Now programming some kind of 2D shooting kind of game with Unity. Making many demos of the shooting mechanic. Playing with the music aspect. Having a few guitars and synths. Trying to learn simple programming things like SQLite.

Work Experience

2018 - 2019	Simple, not experience requiring electronical assembly somewhere in

Salo	(T-Halli). 1 year.
2014	A Not too complicated MS Access/VBA/SQL gig at ODesk (nowadays they call it 'Upwork'). 70 hrs.
2012	Somewhere in Helsinki, Pasila, a computer programming 6 monthly. MS SQL Server, MS Access/VBA, and a bit of SQL. Was doing VBA code based document printing. Was interesting.
2011	Getting to know GMAPS, somewhere in Helsinki, University (kuvio.fi). Goal was to program a GMAPS app with certain features. Time was limited. Simple version accomplished. PHP, MySQL, and Gmaps/JavaScript was being used.
2004 - 2010	This I covered at Työmarkkinatori.
2003	Somewhere at Salo, summer job, applying to it was very exciting. Used a lot Planetsourcecode.com as a origin for my learning. Did something with MS Access, and VBA, only a bit of SQL.

Philosophy, learning moral and ethics

I've been applying sometimes to these mol.fi work places within Helsinki, Turku and Salo axel. This WooCommerce was one I learned from an application when I did a small web shop on my own and experienced its features later on. It's nice you can download a certain amount of a file with it. So to sum it up, I believe in Aristoteles kind of philosophy in life, finding positive rhetorics, to maintain some kind of a active resilience in a face of a problem. This section needs updating
